- Accessory structures, seasonal docks, some repairs or timber activity may only need Code Enforcement approval rather than a full board review. **Contacting the Code Enforcement Officer is required in order to submit an application to the Planning Board** to schedule a pre-construction/activity inspection at a mutually convenient time in order to assess setback distances and other ordinance requirements. This is often necessary prior to board decisions in regard to structures that are currently located less than 100 feet from the high water mark.
- Due to limited time, the Planning Board will not review or discuss additional applications or unexpected inquiries after the agenda has been established. These requests will be deferred until the next meeting.

Smithfield Shore Land Zoning Application

- Code Enforcement Officer and/or the Planning Board must receive a separate form in writing for each inquiry or application for construction for review. **No verbal inquiries are accepted.** Applicants should review the Smithfield Ordinances in order to assure that their plans conform to all applicable requirements. Copies are available at the Town Office for purchase.
- Lot Owners should be present during the Planning Board meeting to answer any questions pertaining to this application. If owners or their representatives are not present and the board is unable to make a clear determination, the application may be tabled until the next regular meeting.
